

Possible Next Steps:

- Short term, low barrier:
 - Soft Matter Wiki (e.g., contribute to organization, text, & examples)
 - MatForge (e.g., set up computational code projects)
- Long term: Supplements/Network funds
 - Consider developing a joint larger project

Break out Discussion Groups: Education, Research, Shared Facilities

- MRSECs' needs (e.g., dissemination?)
 - Complementary strengths (e.g., NSDL & MatDL offer broad dissemination)
 - Funding needs (i.e., to support working together)
- * Each group should choose a spokesperson.
- * Each group has an assigned notetaker.

Workshop Follow up:

- Email correspondence
 - invite workshop participants to participate in Soft Matter Wiki, MatForge, MatDL & NSDL Repositories
- Workshop report
 - distribute draft report to workshop participants and invite feedback
 - disseminate final report
- Gauge interest in defining & developing a larger, joint project

Thank you for your time & participation!
